

Ledvin Manuel Leiva Mata

Software Engineer | Backend, DevOps & Infrastructure

Cartago, Costa Rica • ledvin25@hotmail.com • 8855 2349 • ledvin.dev • ledvin25

Profile

Software engineer with hands-on experience building production web applications and operating VPS/cloud environments. Combines FastAPI, React, PostgreSQL, Docker, Nginx, GitHub Actions, and observability tooling to deliver reliable systems, internal dashboards, and automation workflows.

Experience

Delfix, Infrastructure & DevOps Engineer (Full-time) – San José, Costa Rica (Hybrid) Aug 2025 – Jan 2026

- Designed and deployed hybrid on-premise and cloud infrastructures from scratch, covering networking basics, access control, and service orchestration.
- Implemented an end-to-end monitoring stack with Prometheus, Grafana, Alertmanager, and Blackbox, including per-client dashboards and alerting.
- Automated provisioning, backups, and system updates with Bash and Python to standardize operations and reduce repetitive manual work.
- Hardened ingress with Nginx reverse proxy plus SSL/TLS and enforced least-privilege access for servers and services.
- Wrote deployment and disaster-recovery runbooks to improve reproducibility and maintainability.

Freelance, Software / DevOps Engineer – Remote Jan 2021 – present

- Developed 9+ full-stack web applications for small and medium businesses using FastAPI, React, and PostgreSQL.
- Containerized and deployed production services on Ubuntu VPS environments using Docker, Nginx, and SSL/TLS.
- Implemented CI/CD workflows with GitHub Actions for automated build, test, and deployment processes.
- Built internal tools, dashboards, and operational automations, including payment validation workflows and customer-support integrations.

Avant Glamping, Full Stack Developer (Part-time) – Alajuela, Costa Rica Feb 2024 – June 2025

- Architected and shipped a client-facing portal with React and Three.js for 3D pod visualization and configuration workflows.
- Built a pod configurator with real-time pricing logic and PDF export to standardize quoting.
- Developed an internal CRM/dashboard with FastAPI and PostgreSQL to centralize lead and order management.
- Implemented CI/CD with GitHub Actions and Docker, and deployed services to a self-managed VPS with Nginx and SSL/TLS.

Projects

Odoo Module Update Automation Platform

Web platform to orchestrate Odoo module updates and operational tasks across registered client servers via SSH with separate production and demo workflows.

- Deployed a React front end and FastAPI back end with Docker on an OVH VPS.
- Implemented SSH-based orchestration to run controlled updates on registered servers with environment isolation.
- Created GitHub-driven workflows to pull targeted changes and apply them consistently.
- Automated database dump creation and on-demand delivery for customers.

Glamping Pod 3D Builder

Interactive 3D configurator where users customize glamping pods by changing materials, textures, and modular components.

- Implemented real-time material and component toggles in Three.js for a smooth customization flow.
- Built an asset pipeline from Revit to Blender for cleanup and optimization before exporting web-ready models.
- Optimized models and scene performance to keep interactions responsive in the browser.

Monitoring Stack: Prometheus + Grafana + Alertmanager + Blackbox

Observability stack for service availability and resource monitoring across environments and clients.

- Defined alert rules and notification flows for availability and operational issues.
- Built dashboards for per-client visibility and faster incident triage.
- Added blackbox checks to monitor endpoints externally and detect regressions early.

SINPE Móvil & Bank Transfer Payment Validator

Automated validator that matches SINPE and bank transfer payments against orders by sender, amount, and date, updating order status when validated.

- Validates payer identity, amount, and timestamp against order data.
- Flags mismatches for manual review and keeps an audit trail of validations and status changes.

Education

B.Eng. Tecnológico de Costa Rica, B.Eng. in Computer Science – Cartago, Costa Rica

Expected Dec 2026

H.S Colegio Científico de Costa Rica, H.S in Science – Pérez Zeledón, Costa Rica

Dec 2022

- Second Place at Feria Científica Nacional de Costa Rica.
- Top 10 admission score for Tecnológico de Costa Rica.
- Astronomy Olympiad Second Place.

Skills

Backend: Python, FastAPI, Flask, REST APIs, Bash/Python automation

Frontend: JavaScript (ES6+), React, basic Three.js

DevOps & Infrastructure: Linux (Ubuntu), Docker, Nginx, Git, GitHub Actions, Prometheus, Grafana, Alertmanager, Blackbox Exporter

Databases & Cloud: PostgreSQL, MySQL, MongoDB, Redis, OVH, DigitalOcean, Contabo, basic AWS (EC2, S3)

Languages: English (C1), Spanish (Native)
